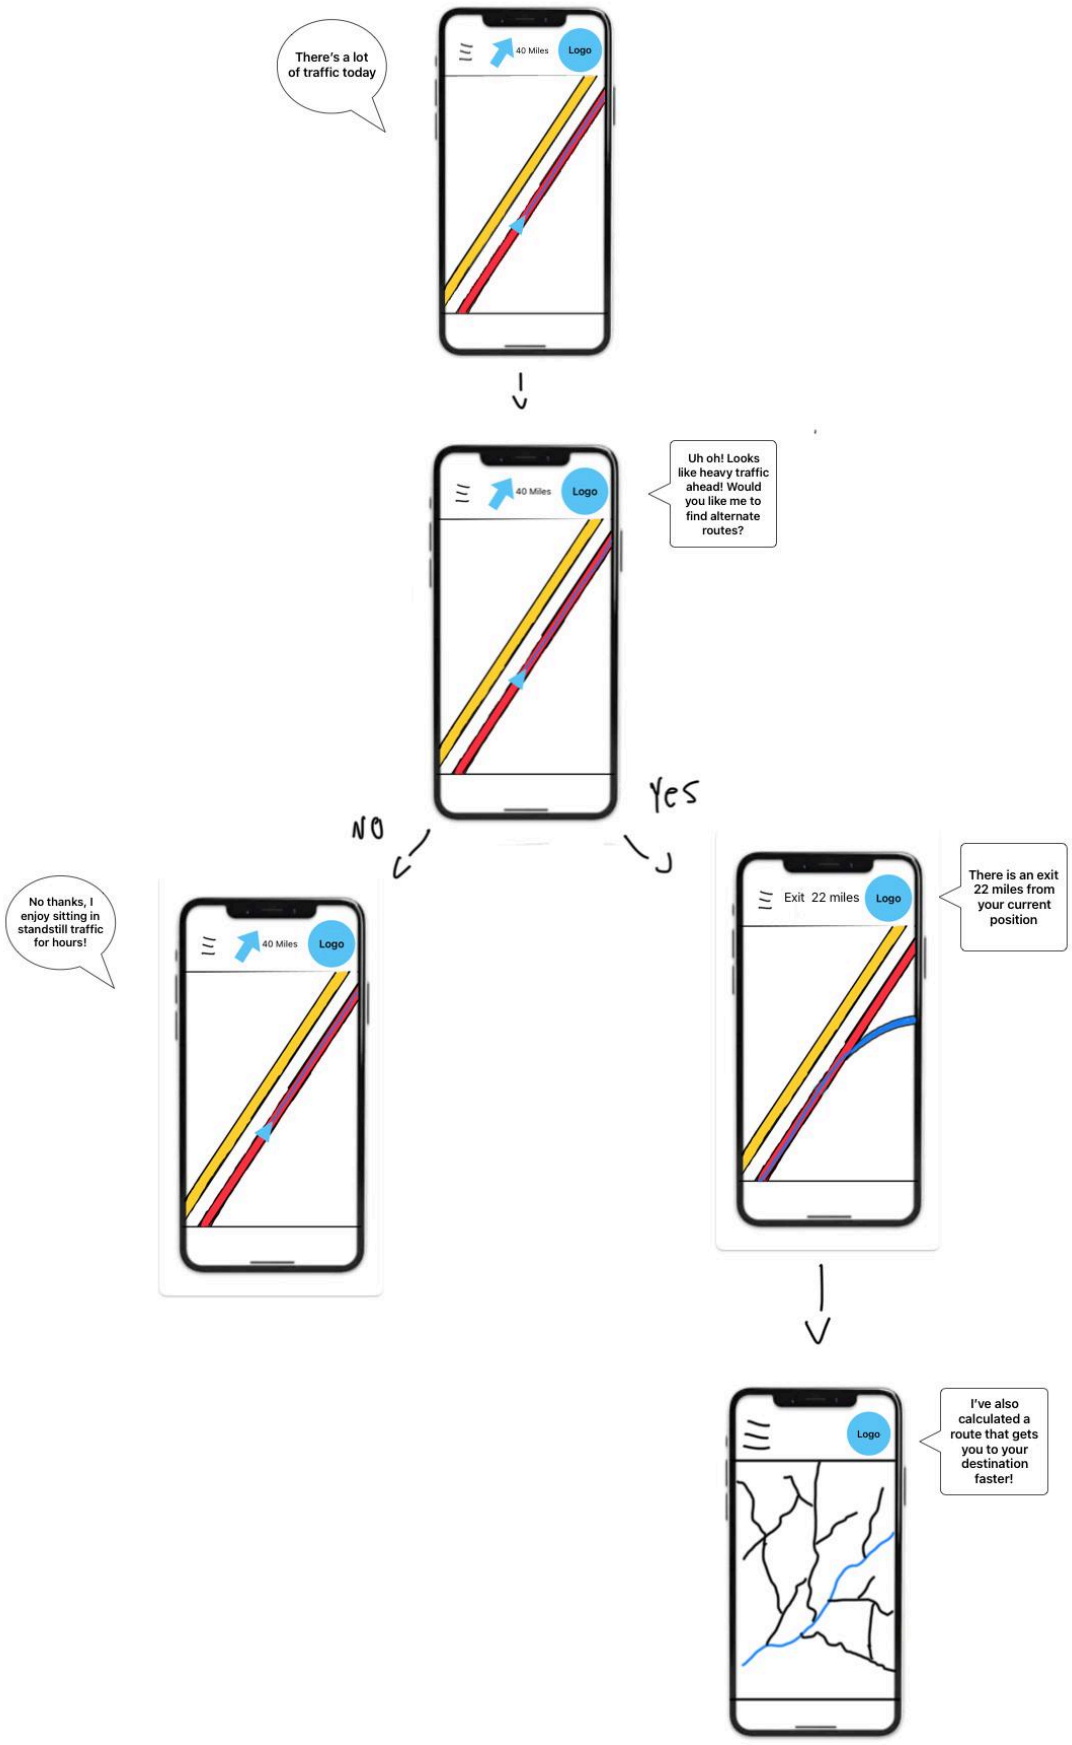
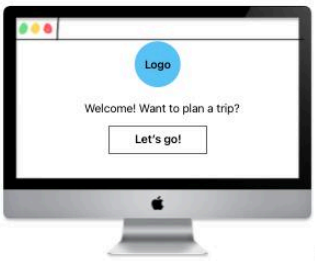
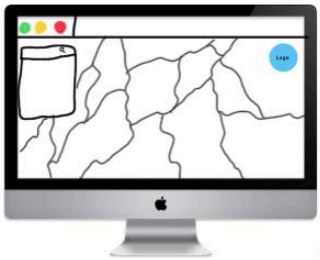
Let's get to know each other!
What would you like me to call you?
No, thanks!
Logo
Great! Now, about me!
What will you call me? Use your microphone to assign me a name!
Logo
Great! Let's get navigating!



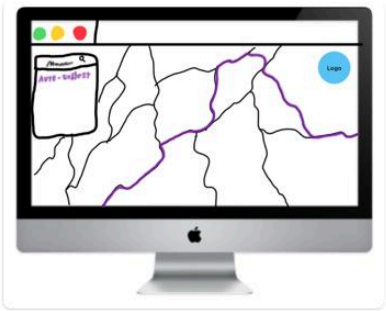
There's a lot of traffic today
40 Miles
Logo
Uh oh! Looks like heavy traffic ahead! Would you like me to find alternate routes?
NO
Yes
No thanks, I enjoy sitting in standstill traffic for hours!
Exit 22 miles
There is an exit 22 miles from your current position
I've also calculated a route that gets you to your destination faster!



Little John is planning a road trip, and is using <name> to do it.



Once he clicks "let's go" it takes him to a map where he can scroll, and input a destination



After he inputs his destination, a route is auto-generated for him

Little John sees that the auto-route makes no sense, so he can just click along a road to reroute the directions

Once Little John fixes the route to his liking, the auto-suggest finished the route
